"Professional with almost 4 years of experience in Data & Analytics domain. Currently working as Informatica Cloud (IICS) Admin for Mercedes Benz AG, a fortune 500 client from the automobile domain for their seamless digital transformation. Informatica certified"

Experience

Infosys Limited *Nov. 2021 - Present*

IICS (Informatica) Admin

Technology Analyst
Present

June.2025 –

- Experienced in leading a team of 4 members and handling the weekly client meetings.
- Experience in working with customers and development teams to understand the requirements, do capacity planning and implement solutions.
- Experienced in procuring, installing and configuring IICS Secure Agent from scratch on Linux servers.
- Implemented a highly available and load-balanced Secure Agent clustering setup in IICS, ensuring consistent uptime and efficient resource utilization, resulting in reduction of job processing time.
- Hosted URLs on different gateway services (Gorilla and Kong gateway) and tested them in NONPROD & PROD along with support and DEV team.
- Worked with different data sources like Kafka, Axway, Service bus etc.

Senior Systems Engineer
June.2025

Dec.2023 –

- Implemented SSO SAML based login in IICS for increased security and enhanced user experience.
- Configured and Set up Enterprise GIT repository (VCS) Integration in IICS for source version control.
- Experienced in working with various Infrastructural and Operational teams like DB, VM and OS (Linux), Network teams to resolve issues related to Networking like firewall clearance, VPN, Proxy, Port opening, File system, NFS and User management.
- Have Integrated Salesforce, Kafka and Oracle with IICS.
- Supported on activities like Infrastructure scaleup and Migration of servers.

Systems Engineer

Nov.2021 – Dec.2023

- Experienced in working with Realtime jobs for various cloud applications integration such as Application connectors, service connectors and Processes.
- Expert in Component/asset migration from one IICS environment to the other for all CDI and CAI
- Experienced in working with IICS support and R&D team for troubleshooting asset/environment level issues. Managed Production and Non-Production deployments (IICS, Unix and Oracle).
- Experienced in troubleshooting, tuning and performing RCA of issues/bugs in IICS jobs.
- Worked with ticketing tools like CISM, Service Now, Confluence, etc.
- Supported on activities like Infrastructure scaleup and Migration of servers.
- Developed basic Unix scripts and Real-time process in IICS CAI for monitoring the caches generated on the servers for high availability during the Data Integration job runs.

Bugs Identified in IICS Product

- Informatica Postgres table aelock issue due to publication of real-time assets in CAI.
- Precision error in mapping task when mapping is parametrized in CDI.
- Realtime (CAI) schedule going inactive when threads are unavailable in the server.
- Kafka thread issue due to thread leakage from Kafka client library.
- Logs generations were very high in Catalina due to Kafka client upgrade in IICS major release.

Project Details

- Client: Daimler AG (Mercedes-Benz) (southeast Asia and Europe)
- Project experience: Nov 2021 – present
- Project status: On-going

Expertise

- Informatica Cloud Administration
- Data Migration
- Structured Query Language (SQL)
- Unix

Tools

- Data warehousing solution: IICS
- Database: Oracle & Postgres (Informatica)
- OS: Linux (SLES), Windows
- Ticketing: CISM & Service Now (SNOW).

Education

Vignana Bharathi Institute of Technology

Aug. 2016 - Aug. 2020

- Bachelor of Technology
- Dept: Computer science and engineering.

Certifications/Courses

- Informatica PowerCenter Cloud Edition Developer Professional Certification - Informatica
- Cloud Application Integration Services for Developers R42 - **Informatica**
- Infosys Informatica cloud services Administration (IIC Admin) - **Infosys**
- Infosys Certified Informatica Cloud Professional - **Infosys**
- Infosys Certified SQL Associate - **Infosys**

Hobbies
