

Job Description – Full stack developer (Angular + Springboot)

Position: Software developer – 1 Opening

Experience: 3–4 years

Location: Bengaluru (On-site only, no Work from Home option)

Employment Type: Probation followed by Full-Time

About Us

OMS Software is an Australia-based IT company with development offices in Bangalore and Pune, delivering cloud-based solutions for TIC companies, testing laboratories, inspection firms, and NDT/DT operations.

Our platform streamlines workflow management, inspections, testing, and compliance, eliminating the need for extensive IT infrastructure. It is widely adopted across industries, including manufacturing, fabrication, mining, oil & gas, construction, infrastructure, aerospace, automotive, and defence.

About the Role

We are looking for a passionate and detail-oriented Full Stack Developer with hands-on experience in Angular (frontend) and Spring Boot (backend). The ideal candidate will be responsible for developing, testing, and maintaining scalable web applications, integrating REST APIs, and collaborating closely with cross-functional teams to deliver high-quality software solutions.

Roles & Responsibilities

- Design, develop, and maintain responsive web applications using Angular for frontend and Spring Boot for backend.
- Build and integrate RESTful APIs to ensure seamless communication between client and server.
- Write clean, efficient, and maintainable code following best practices and coding standards.
- Work closely with cross-functional teams including QA engineers, and product managers to deliver robust solutions.
- Implement secure authentication, authorization, and data validation mechanisms.
- Optimize application performance, scalability, and reliability.
- Troubleshoot, debug, and resolve technical issues across the full stack.
- Participate in code reviews, unit testing, and continuous integration/deployment.
- Stay updated with emerging technologies and contribute to improving development processes.
- Document system designs, APIs, and development processes for internal reference.
- Support deployment activities and assist in maintaining existing applications.

Required Skills & Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- 3-4 years of professional experience in full stack development using Angular (frontend) and Spring Boot (backend).
- Strong knowledge of Angular 14+, TypeScript, and Angular Material for building dynamic and responsive UIs.
- Solid understanding of Java, Spring Framework, Spring Boot, and RESTful API development.
- Experience with database design and queries using MongoDB.
- Familiarity with authentication and authorization mechanisms such as Spring Security.
- Experience in version control using Git or similar tools.
- Good understanding of API integration, and error handling best practices.
- Knowledge of unit testing frameworks such as Jasmine/Karma.
- Strong analytical, debugging, and problem-solving skills.
- Excellent communication and collaboration abilities within cross-functional teams.

Good to Have (Optional Skills)

- Familiarity with ISO 9001 / ISO 27001 audits and documentation practices.
- Experience with frontend optimization techniques and performance tuning.

What We Offer

- Opportunity to work on challenging projects in regulated industries.
 - A collaborative and learning-driven work environment.
 - Competitive salary and benefits package.
