

Job Description: Devin.ai Consultant (Enterprise AI Implementation Specialist)

Location: Bangalore (Onsite)

Experience: 6–12 years (*AI/ML, DevOps, MLOps, or Platform Engineering – mandatory*)

Budget: Up to ₹35 LPA

Role Type: Contract

Department: Technology / AI Center of Excellence

About the Role

We are looking for a highly skilled **Devin.ai Consultant** to lead the enterprise-grade configuration, integration, and adoption of **Devin**, an autonomous AI software engineering platform.

This role requires close collaboration with engineering, DevOps, security, architecture, and business teams to ensure Devin is deployed **securely, scalably, and aligned with existing software delivery processes**.

The consultant will serve as the **primary Subject Matter Expert (SME)** for Devin.ai, responsible for defining best practices, governance frameworks, and driving enterprise-wide adoption to maximize engineering productivity.

Key Responsibilities

1. Devin.ai Platform Setup & Integration

- Lead configuration and enterprise environment setup of Devin.ai.
- Integrate Devin with existing developer tools, including:
 - GitHub
 - CI/CD pipelines (Jenkins, GitHub Actions, Azure DevOps, etc.)
 - Jira / ServiceNow
 - Internal code repositories and artifact stores
- Configure access controls, role-based permissions, and secure networking.

2. Enterprise Architecture & Security

- Collaborate with architecture and cybersecurity teams to ensure:
 - Data security, compliance, and privacy standards
 - Environment isolation and secure deployments

- Secure API usage and credential management
- Design and implement governance frameworks for responsible and safe AI usage.

3. Workflow Design & Process Enablement

- Define integration of Devin across SDLC, DevOps, QA, and engineering workflows.
- Develop templates, SOPs, and best practices for:
 - Autonomous task execution
 - Code generation and code review
 - Automated testing and deployments
 - Observability and quality checks
- Enable multi-team adoption with structured operational readiness plans.

4. Change Management & Enablement

- Conduct hands-on training sessions, workshops, and enablement programs.
- Create documentation, user guides, and troubleshooting playbooks.
- Support pilot implementations, use-case discovery, and enterprise-scale rollouts.

5. Technical Leadership & Advisory

- Act as the SME for AI-driven software engineering workflows.
- Advise on scaling DevOps, platform engineering, and AI-assisted development.
- Collaborate with product and engineering leadership on roadmap alignment.

Required Qualifications

- **6+ years** of experience in Software Engineering, DevOps, MLOps, or Platform Engineering.
- Strong understanding of:
 - LLM-based coding tools / AI copilots
 - CI/CD pipelines
 - Cloud platforms (AWS, Azure, GCP)

- Containerization (Docker, Kubernetes)
 - Hands-on experience integrating or configuring developer platforms.
 - Knowledge of enterprise security standards, secure coding practices, and governance.
 - Strong scripting skills (Python, Bash, YAML).
 - Excellent communication and stakeholder management skills.
-

Preferred Qualifications

- Experience implementing AI agents or autonomous coding platforms.
- Exposure to Devin.ai, GitHub Copilot, AWS CodeWhisperer, or similar tools.
- Knowledge of SDLC automation, Infrastructure as Code (Terraform), and DevSecOps.
- Experience with enterprise-level engineering transformation initiatives.
- Cloud, DevOps, or AI-related certifications (AWS / Azure / GCP).
