Professional Summary

Results-driven IT professional with 5.3 years of experience specializing in Identity and Access Management (IAM) and Microsoft Entra ID (formerly Azure AD). Proven expertise in implementing and managing enterprise IAM solutions, configuring secure authentication flows, and integrating Entra ID with cloud and on-premises applications. Strong background in PIM, PHS, PTA, Conditional Access, OAuth flows, and SSO. I am well-versed in configuring and troubleshooting Azure Active Directory issues related to Microsoft 365 and transitioning from Active Directory to Azure AD. Additionally, I have hands-on experience in creating Azure Virtual Machines and resolving authentication issues related to Azure VMs. My skill set also includes working with One Identity IAM Manager and One Identity - PAM. Lastly; I possess knowledge of Sail point and PowerShell scripting.

Key Skills

Microsoft Entra ID (Azure AD), Identity and Access Management (IAM), Azure AD B2B/B2C, Privileged Identity Management (PIM), Password Hash Sync (PHS) & Pass-Through Authentication (PTA), Conditional Access Policies, OAuth 2.0, OpenID Connect, SAML, Azure AD Connect, SSO, MFA, Identity Governance, RBAC, Access Reviews, PowerShell, Graph API, Microsoft Defender for Identity

Professional Experience

IAM ENGINEER | CYNOSURE | RACKSPACE | NOV 2020– DEC 2025

- Designed and implemented a hybrid identity model using Azure AD Connect with PHS and PTA for 15,000+ users.
- Deployed and configured Privileged Identity Management (PIM) to secure admin roles with just-in-time access. Reduced security risk by implementing least-privilege access using Azure PIM.
- Improved compliance by automating privileged access reviews
- Implemented privileged access management (PAM) controls and multi-factor authentication (MFA) solutions, reducing unauthorized access risks and strengthening overall security posture.
- Streamlined user onboarding and policy configuration, while maintaining compliance with organizational standards.
- Monitored system health and performance, proactively identifying and resolving issues to minimize downtime and enhance reliability.

- Strong understanding of identity federation, Single Sign-On (SSO), and Multi-Factor Authentication (MFA), including secure authentication and authorization flows
- Hands-on experience with directory services such as Active Directory and Microsoft Entra ID (Azure AD) for identity management and access control
- Proficient in PowerShell scripting for automation, reporting, and administrative tasks related to identity and access management
- Excellent problem-solving skills with strong attention to detail when analysing access, authentication, and provisioning issues
- Proven ability to work independently and collaboratively within cross-functional teams to deliver secure and reliable solutions
- Troubleshoot complex IAM issues and coordinated with cross-functional teams, achieving faster resolution times and improved user satisfaction.
- Implemented and managed Azure Privileged Identity Management (PIM) to control and monitor privileged access.
- Configured Just-In-Time (JIT) role activation for Azure AD and Azure resource roles.
- Enforced approval workflows, MFA, and access reviews for privileged roles .
- Managed eligible vs active role assignments to minimize standing access.
- Monitored and audited PIM alerts, role activations, and sign-in logs.
- Performed periodic access reviews to ensure least-privilege compliance. Set up RBAC aligned with Zero Trust principles.

Tools/Technologies: Azure AD B2C, OAuth, SAML, Access Packages, Conditional Access.

-Collaborated with cyber security teams to integrate Microsoft Defender for Identity and Entra ID Identity Protection for threat detection.

-Built real-time alerting and response workflows for risky sign-ins, unusual login patterns, and privilege escalations.

-Managed identity lifecycle processes including provisioning, de-provisioning, and access reviews.

- Coordinated with security teams to remediate risky sign-ins using Identity Protection.

-Ensured compliance with ISO 27001 and NIST through audit and reports.

Tools/Technologies: Azure AD, Identity Protection, Access Reviews, Compliance Manager

- Enforced Conditional Access Policies and MFA to strengthen identity security.

-Integrated IAM platforms with cloud and on-premises systems using protocols like OAuth 2.0, OpenID Connect, and SAML 2.0.

DESKTOP SUPPORT ENGINEER | CYNOSURE | AUJIS | AUG 2020 – NOV 2020

-Provided Level 1 & Level 2 technical support to end users for hardware, software, and network-related issues.

-Troubleshoot Windows OS, application errors, and system performance issues.

-Supported Microsoft Outlook, Office 365, and corporate applications.

-Logged, tracked, and resolved incidents using ticketing systems while adhering to SLA guidelines.

-Delivered on-site and remote support using remote access tools.

Education

Completed B.E from SIR CR REDDY COLLEGE OF ENGINEERING (Andhra University)
