PROFESSIONAL SUMMARY

Experienced professional with 15 years of experience in Capital Markets & Investment Banking domain, including 7 years as Business Analyst specializing in project lifecycle & change management, excelling in stakeholder management. Proficient in Business Case/BRD creation, requirement gathering, solution design, implementation and delivery. Strong domain knowledge with a consistent track record of delivering successful automation and digital transformation initiatives. Adept at utilizing analytical thinking and problem-solving skills to drive process improvements, enhance project outcomes, and deliver comprehensive documentation. Expertise in UAT planning and business case preparation ensures successful project execution.

PROJECT

1) Automation of Manual Reconciliation - TLM Application - Cash /Stock Reconciliation Transformation (FLEXCUBE - SEBILL) to TLM

Role: [Business Analyst]

Description:

Successfully automated the manual reconciliation process by implementing and configuring the Transaction Lifecycle Management (TLM) application, resulting in improved efficiency, accuracy, and reduced operational risk.

Key Responsibilities & Achievements:

Analyzed existing manual reconciliation workflows to identify pain points and automation opportunities.

Designed and implemented automated matching rules and exception management in TLM.

Collaborated with cross-functional teams (operations, IT, and finance) to ensure seamless data integration from multiple sources (SWIFT, GL, bank statements, etc.).

Validated and tested automated reconciliation logic to ensure data accuracy and compliance.

Reduced reconciliation time and manual intervention .

Provided user training and created process documentation for end-users.

Agile Business Analyst

2) Automation of Income and Corporate Action Notifications - Automated Notification Management (ANM)

Role: [Business Analyst]

Description:

Implemented an automated process for income and corporate action (CA) notifications leveraging SWIFT messaging and Euroclear data integration, eliminating manual intervention and ensuring timely and accurate event processing.

Key Responsibilities & Achievements:

Designed and developed an automated workflow to capture and process income and corporate action notifications from SWIFT MT564/566 and Euroclear messages.

Integrated SWIFT message feeds into internal systems to replace manual uploads and data entry.

Configured business rules and exception handling to validate event details and reconcile discrepancies.

Improved notification accuracy and timeliness of event updates to downstream systems and stakeholders.

Reduced manual effort and operational risk , enhancing straight-through processing (STP).

Coordinated with technology and operations teams to ensure smooth deployment and testing.

Provided training and documentation for operations teams post-implementation.

Tools & Technologies: SWIFT, Euroclear, SQL, Excel, TLM / SmartStream ,DTCC, Bloomberg, and IDS feeds
