

SYED FIROZ AHAMED

Business Analyst – Capital Markets & Regulatory Change

Bangalore, India | 14+ years IT & Banking Experience

PROFESSIONAL SUMMARY

Business Analyst with 14+ years of experience across investment banking, capital markets, and regulatory change initiatives. Strong background in translating complex business and regulatory requirements into functional specifications, user stories, and data mappings. Extensive exposure to trading book products including FX, Money Markets, Bonds, Equities, and OTC Derivatives, with hands-on experience supporting Basel I/II/III aligned risk and control frameworks. Proven expertise in SQL-driven data analysis, UAT leadership, regression testing, and cross-functional collaboration between Finance, Risk, Operations, and IT teams. Well-positioned to support prudential and regulatory reporting transformation programs.

CORE SKILLS

- Business Analysis: BRD, FRD, Functional Specifications, User Stories, Acceptance Criteria
 - Regulatory & Risk Exposure: Basel I / II / III, Counterparty Credit Risk (CCR), Risk Controls
 - Capital Markets: FX, Money Markets, Bonds, Equities, Fixed Income, OTC Derivatives
 - Data Analysis & Testing: SQL Analysis, Data Reconciliation, Root Cause Analysis, Regression & UAT
 - Delivery Methodologies: Agile / Scrum, Waterfall, SDLC
 - Stakeholder Management: Finance, Risk, Operations, IT, External Vendors
 - Tools: JIRA, Confluence, SQL, MS Excel (Advanced), PowerPoint
-

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) | Senior Business Analyst (Assistant Consultant)

July 2022 – August 2025

- Led requirement gathering and analysis for capital markets and regulatory-aligned IT initiatives across FX, Money Markets, Derivatives, Bonds, and Equities.
- Translated business and risk requirements into BRDs, FRDs, and detailed functional specifications for development and QA teams.
- Worked closely with Finance, Risk, and Operations stakeholders to validate data definitions, control requirements, and reporting logic.
- Supported Basel-aligned risk and regulatory change initiatives by analyzing upstream trade, position, and reference data used in downstream reporting.
- Performed detailed SQL-based data analysis to investigate breaks, explain variances, and support regulatory and management reporting accuracy.
- Defined acceptance criteria and test scenarios; led UAT cycles including defect triage, regression testing, and sign-off coordination.

- Collaborated with developers and architects to explain calculation logic, data transformations, and functional flows.
 - Managed Agile delivery activities including backlog grooming, sprint planning, and sprint metrics reporting.
 - Supported production releases and provided post-implementation issue analysis and resolution.
-

ANZ Banking Group | Process Specialist – Post Trade Settlements

November 2010 – July 2022

- Supported post-trade settlement operations across multiple trading book asset classes including FX, Money Markets, Bonds, Equities, Fixed Income, and Derivatives.
 - Performed T+1 reconciliations, investigated settlement breaks, and conducted root-cause analysis to mitigate financial and operational risk.
 - Processed and validated SWIFT payments (MT202, MT103) ensuring adherence to internal controls and regulatory standards.
 - Acted as a key liaison between Operations, IT, Risk, and external counterparties to resolve data and process issues.
 - Participated in system enhancements and regulatory-driven process changes, contributing to BRDs, functional reviews, and UAT execution.
 - Conducted functional, integration, regression, and UAT testing for new systems and reporting changes.
 - Supported audit and compliance initiatives by ensuring accurate documentation, controls, and traceability of processes.
-

DATA & TESTING EXPERIENCE

- Strong experience in data mapping, reconciliation, and variance analysis between source systems and downstream reporting layers.
 - Extensive involvement in UAT planning, execution, and defect management for regulatory and risk-related changes.
 - Experienced in explaining data and calculation changes to business and technology stakeholders.
-

EDUCATION

MBA – Finance

ADDITIONAL INFORMATION

- Experience working with global stakeholders across APAC and EMEA regions.
- Strong understanding of trade lifecycle data and its impact on risk, controls, and reporting.
- Quick learner with exposure to regulatory reporting concepts and vendor-led reporting solutions.
