 - Power Automate Desktop
 - Microsoft Dataverse
 - SharePoint Online
 - Co-Pilot Studio
 - REST APIs Integration
 - Power Fx
 - Problem Solving & Critical Thinking
 - Team Collaboration and stakeholder communication
 - Agile & scrum methodologies
-

WORK EXPERIENCE

Consultant

KPMG - Bangalore, India | March 2022 – Present

Client: London Stock Exchange Group (LSEG)

- Designed and developed a Data Sharing Agreement (DSA) solution on Power Apps (Canvas App), facilitating seamless dataset approval workflows.
- Integrated PowerApps with SharePoint, Dataverse, REST API (Microsoft Graph) and third-party APIs to ensure data consistency and reliability.

- Worked on Model driven applications to customize entities, forms, views and dashboard.
 - Designed responsive UI/UX for PowerApps applications.
 - Implemented role-based security in Dataverse to ensure compliance with data governance policies.
 - Managed Power Platform solution deployments to production.
 - Requirement gathering and refinement with stakeholders in Agile.
 - Provided technical training and documentation for end-users and stakeholders.
 - Involved in cross functional team collaboration to deliver scalable low code solutions.
 - Implemented Co-pilot with Power Automate templates to eliminate the dependency on developers for deleting requests from the backend.
-

ACHIEVEMENTS

Associate Consultant KPMG - Bangalore, India

- Built an Employee Onboarding Platform integrating Intune, SharePoint, and Power Automate, streamlining asset allocation and onboarding logistics.
 - Developed custom security roles and created custom connectors for dynamic API consumption.
 - Actively contributed to deployment pipeline creation, process mining, and system optimization.
 - Delivered apps with high usability, appealing design, and seamless admin interactions.
-

Associate Consultant Capgemini - Mumbai, India | Oct 2018 – Feb 2022

Client: Kloeckner & Co.

- Designed an unattended RPA bot for journal voucher processing via Power Automate Desktop and SAP integration.
- Automated business workflows using Power Automate, reducing manual effort by 95%.

Client: Sandvik Mining

- Developed Java-based extractors to bridge data gaps in global data warehouse systems, generated XML for downstream processes.
-

EDUCATION

Bachelor of Technology
Durgapur Institute of Advanced Technology and Management
2017
