PROFESSIONAL EXPERIENCE

Senior Program Manager – 07/2024 - 12/2025 - Optimum InfoSystem Private Limited - client CitiBank NA —Mumbai

Project: ICM Transformation - Management of complex, critical & large professional client credit risk, , working on the delivery of the multi-year projects to deliver strategic state ICM (Institutional Credit Management) capabilities for Transaction Management dept -Collateral Management team.

Role Overview : The Senior Program Manager will lead and oversee the Institutional Credit Management (ICM) Transformation Initiative, ensuring alignment with Citi's strategic objectives and governance standards. This role requires managing a portfolio of complex projects across Wholesale and Counterparty Credit Risk (WLCR/CCR), driving program execution, risk management, and stakeholder engagement across global lines of business. The incumbent will serve as a key partner to senior leadership, ensuring delivery of transformation outcomes within strict regulatory and governance frameworks.

Key Responsibilities:

Program Leadership & Strategy

- Provide strategic oversight and governance across multiple projects within the ICM Transformation Initiative.
- Align program deliverables with Citi's transformation priorities, ensuring compliance with PM Policies and Standards. Partner with senior stakeholders to define program objectives, scope, and success metrics.
- Partner with senior stakeholders to define program objectives, scope, and success metrics.

Governance & Oversight

- Establish and maintain program governance structures, ensuring adherence to Transformation Program Office guidelines.
- Conduct program reviews, health checks, and global reporting to senior management.
- Ensure consistent monitoring of risks, issues, and dependencies across the program portfolio.

Risk & Compliance Management

- Oversee execution of risk control coverage strategies across program components.
- Identify emerging risks, socialize with stakeholders, assess business impact of new /existing application implementation and ensure mitigation strategies are implemented.
- Support regulatory and audit requirements, producing documentation and evidence as needed.

Program Execution & Delivery

- Drive timely delivery of program plans, resources, and reporting across ICG lines of business.
- Coordinate cross-functional working groups, ensuring alignment and accountability across stakeholders.
- Support the Program Director in resolving program-level risks/issues and ensuring execution of the book of work.
- Data Foundation & Digitization (Agreement and Monitoring & Valuation) NLP-Driven CSA Digitalization: Lead the implementation of Natural Language Processing (NLP) solutions to extract, standardize, and store complex legal terms (Haircuts, Thresholds, Eligibility) from Credit Support Annexes (CSAs) into a centralized data repository.
- Risk & Exposure Management - Unified Exposure & MTM Service: Manage the project to integrate disparate trade and market data feeds into a single, high-performance service for calculating consistent and timely Net Exposure (Mark-to-Market) across all counterparty relationships.
- Reconciliation Workbench: Deliver an automated workbench to flag and resolve differences between internal and counterparty exposure calculations.
- Rules Engine Development: Oversee the transformation of legal terms into an executable rules engine for

automated eligibility checks and compliance monitoring.

Stakeholder Engagement & Communication

- Act as a central point of contact for senior business leaders, project managers, and governance bodies.
- Deliver presentations and updates to ICM and senior management on program status, risks, and plans.
- Facilitate collaboration across global teams to ensure transparency and alignment.

Senior Program Manager – Digital Transformation, 05/2023-06/2024 - CareerNet Technologies -client Willis Towers Watson (WTW)—Mumbai

Project: Digital Transformation project for strategic Planning and global implementation for major areas: People, Process, Location, IT (Infrastructure and Database) for E2E life cycle of insurance.

Feature. Backlog, Governance and Management

- Support the CRB (Corp. Risk & Broking) product owner in the design, set-up, and management of a global steering committee, project managers and required regional forums.
- Own and manage the production of input materials for steering/governance forums—set the standard, design templates by which new features or enhancements are described and the benefits estimated.
- Define, manage, and maintain an overall product backlog for CRB.
- Communicate the outcomes of CRB governance forums with business and technology stakeholder.

Project Management

- Develop and maintain project plans for CRB working closely with relevant technology, transformation, and business stakeholders to agree on actions, owners, and delivery dates.
- Identify and actively manage inbound and outbound dependencies for the CRB plan.
- **Lead multiple complex strategic initiatives:** Partner with senior members of the Controllershship organization and cross-functional teams (Billing Platform, Financial Systems Enablement, IT/Support, ERP PMO, M&A, Finance) to ensure resources are focused on the highest priority work and all projects are delivered.
- Own the end-to-end delivery of medium to highly complex projects, identifying key business stakeholders; leading on defining business case, project objectives, scope, resources and agreed set of expected benefits and outcomes.
- Create and maintain high quality project plans (with built in risk mitigation strategies) and work packages that support delivery, ensuring that responsibilities are assigned to project resources.
- Evaluate delivery options and the team's performance, providing feedback where necessary and adjusting plans at regular intervals against the scope, schedule, budget, risks, outcomes, and benefits.
- Provide regular forecasts the future Change and BAU resources required for the project.
- Provide the project team with direction and confidence to deliver and ensure that the project delivers the required benefits and outcomes within the specified tolerances of time, cost, quality, scope, benefit

Stakeholder Engagement

- Act as primary contact for global WTW stakeholders from technology, business, and transformation teams.
- Act as gatekeeper to the CRB governance processes and provide advice to stakeholders on how to engage on CRB topics.
