

+91-8879504150

tarun_goreja@yahoo.in

CORE COMPETENCIES

- ▶ Enterprise Data Architecture & Design
- ▶ Cloud Data Warehouse Modernization
- ▶ Legacy-to-Cloud Migration Strategy
- ▶ End-to-End Data Lifecycle Management
- ▶ Stakeholder Engagement
- ▶ Business Alignment
- ▶ Data Lake & Data Platform Architecture
- ▶ ETL/ELT Strategy & Governance
- ▶ Data Modeling
- ▶ Performance Optimization
- ▶ Large-Scale Data Migration/Validation
- ▶ Solution Architecture
- ▶ Technical Blueprinting
- ▶ Pre-Sales Enablement & Deal Shaping
- ▶ Agile Delivery & SDLC Governance
- ▶ Offshore-Onsite Delivery Management
- ▶ Team Leadership, Mentoring & Capability Building

TECHNICAL SKILLS

- ▶ **Data & Analytics Platforms:** Snowflake, StreamSets, Informatica PowerCenter, Azure Services, DBT
- ▶ **Programming & Scripting:** SQL, PL/SQL, Python, Unix Shell Scripting
- ▶ **Databases:** Snowflake, IBM DB2, IBM Netezza, Oracle (10g/11g), MySQL
- ▶ **Domain Expertise:** Enterprise Data Warehousing across P&C Insurance, Financial Services, and Retail
- ▶ **BI & Visualization:** Power BI, Tableau, MicroStrategy

CERTIFICATIONS

- ▶ SnowPro Core (COF-C02)
- ▶ Agile Certified

SOFT SKILLS

TARUN GOREJA

Solution & Data Architect | Snowflake Cloud Migration Expert
| Large-Scale Data Platforms | Enterprise Data Warehousing

PROFILE SUMMARY

- ▶ Seasoned **Solution & Technology Architect** with **14+ years** of deep expertise in **enterprise data warehousing, cloud modernization, and large-scale data platform architecture** across Insurance and Retail domains.
- ▶ Proven ability to **bridge business and technology**, translating complex functional requirements from senior stakeholders into scalable, high-performance technical architectures.
- ▶ Strong architect-level command over **end-to-end data ecosystems**, spanning source systems, ETL/ELT pipelines, data lakes, cloud data platforms, analytics layers, and reporting.
- ▶ Recognized leader with extensive **onsite US experience (10+ years)**, adept at engaging CXOs, business heads, and cross-functional teams to drive consensus and delivery.
- ▶ Hands-on expert in **legacy-to-cloud transformations**, with a strong focus on data accuracy, governance, performance optimization, and risk mitigation during migrations.
- ▶ Strategic thinker with growing exposure to **pre-sales, solution acceleration, and account growth**, contributing to expanded deal value and differentiated offerings.
- ▶ Continuous learner actively upskilling in **Snowflake, GenAI, Agentic AI**, and upcoming **IIT Madras AI program**, aligning technology leadership with future-ready capabilities.

KEY HIGHLIGHTS

- ▶ Progressed steadily at **Accenture since 2011**, evolving from hands-on data engineering roles to **Solution Architecture and technical leadership** for mission-critical enterprise programs.
- ▶ Designed and delivered **customer analytics data marts** for large US insurance clients, enabling demographic insights, customer behavior analysis, and data-driven business growth.
- ▶ Led multi-year **US onsite engagements** with major insurance clients, collaborating with **Marketing, Finance, R&D & Operations stakeholders** to build domain-aligned data solutions.
- ▶ Managed and mentored **20+ member offshore teams**, driving Agile delivery, SDLC governance, and high-quality execution across distributed teams.
- ▶ Played a pivotal role in **large-scale cloud migration programs**, including:
 - **IBM DB2 → Snowflake** migration for an insurance enterprise
 - **Oracle → Snowflake** migration for a Fortune-scale US retail client
- ▶ Successfully migrated and modernized ETL ecosystems, including:
 - **Informatica PowerCenter → Snowflake-compatible ETL**
 - **Oracle Data Integrator (ODI) → StreamSets pipelines & DBT**
- ▶ Designed **Azure Data Lake-centric ingestion frameworks**, enabling scalable data ingestion before seamless Snowflake consumption.
- ▶ Led migration and validation of **110+ TB enterprise data**, ensuring zero data loss and high fidelity through rigorous reconciliation strategies.
- ▶ Co-created **proprietary Smart Data Mover and Smart Data Validator tools**, significantly accelerating migration timelines and improving validation accuracy.
- ▶ Contributed to **pre-sales and account expansion**, helping increase deal size from **\$600K to \$1.5M** through tool-led differentiation and solution innovation.
- ▶ Earned multiple **Accenture internal awards (ACE and others)** for delivery excellence, client impact, and technical leadership.

CAREER TIMELINE

EDUCATION

B.Tech in Computer Science (2011)
Mukesh Patel School of Technology Management & Engineering, NMIMS University, Mumbai | **CGPA: 3.17 / 4.0**

WORK EXPERIENCE

ACCENTURE SERVICES PVT. LTD. | July 2011 – Present

Solution Tech Architect | Project: IBM Netezza to Snowflake Migration | Los Angeles, USA (Jul 2024 – Present) | Environment: Snowflake, StreamSets, IBM Netezza, Unix, Azure, Control-M

- Architected end-to-end cloud data warehouse migration solutions, translating complex client requirements into scalable Snowflake-based architectures.
- Established enterprise-wide data modeling standards, governance frameworks, and migration best practices to ensure performance, scalability, and data integrity.
- Engineered comprehensive migration strategies, technical blueprints, and cutover plans for large-scale historical data movement.
- Orchestrated historical data migration leveraging Accenture proprietary migration accelerators, ensuring minimal downtime and data reconciliation accuracy.
- Collaborated with cross-functional business, engineering, and platform teams to align technical solutions with business objectives.
- Acted as senior technical advisor across the migration lifecycle, resolving architectural risks and performance bottlenecks.
- Drove business development initiatives, identifying and closing opportunities worth **\$600K**, contributing to a **10% uplift in overall project revenue**.
- Mentored junior architects and engineers, fostering technical excellence, innovation, and continuous capability building.

Associate Manager / Solution Tech Architect | Project: Data Repository Release | Los Angeles, USA (Nov 2022 – Jun 2024) |

Environment: Snowflake, Informatica PowerCenter 9.x/10.x, IBM DB2, Unix

- Led stakeholder engagement to elicit business requirements for data warehouse enhancements and new DataMart implementations.
- Translated business needs into detailed technical specifications and architectural designs for development teams.
- Directed offshore teams across the full SDLC, ensuring timely delivery, quality assurance, and adherence to design standards.
- Identified and incubated innovative solution opportunities, driving incremental revenue and expanding client engagement footprint.
- Conceptualized & delivered an **Agency Dashboard** for an insurance client as a strategic innovation, generating **\$200K in incremental revenue**.

Team Leader / Application Development Specialist | Project: Snowflake Migration | Mumbai, India (Dec 2020 – Oct 2022) |

Environment: Snowflake, Informatica PowerCenter 9.x/10.x, IBM DB2, Unix

- Designed target-state cloud data architecture for enterprise migration from IBM DB2 to Snowflake.
- Defined project scope, success metrics, milestones, and delivery roadmaps in alignment with stakeholder expectations.
- Built and executed detailed project plans covering timelines, dependencies, and resource allocation.
- Coordinated across business analysts, engineering teams, and third-party vendors to ensure delivery alignment.
- Led and coached cross-functional teams of data engineers and analysts, driving high performance and collaboration.
- Governed project financials, ensuring optimized utilization of resources and cost-effective delivery.

Team Leader / Application Development Specialist | Project: Data Repository Release | Los Angeles, USA (Aug 2015 – Nov 2020)

Environment: Informatica PowerCenter 9.x/10.x, IBM DB2, Unix

- Analyzed business requirements and converted them into optimized Informatica technical designs and ETL frameworks.
- Managed offshore development teams across requirement analysis, design, build, testing, and deployment phases.
- Authored requirement scope documents and detailed ETL design specifications to standardize delivery.
- Delivered time-critical ETL solutions to meet aggressive project timelines and production commitments.
- Conducted rigorous technical and functional reviews of ETL workflows to ensure performance and data quality.
- Streamlined operational processes by automating historical fix jobs and recurring workflows.

Senior Software Engineer / Application Development Senior Analyst | Project: Customer Analytics DataMart (CADM) | Hyderabad, India (Mar 2015 – Aug 2015) |

Environment: Informatica PowerCenter 9.x, IBM DB2, Unix

- Authored comprehensive technical and design documentation across multiple analytical modules.
- Designed complex household-level data models and technical workflows to support advanced analytics.
- Delivered an end-to-end archival solution covering architecture, design, and implementation.
- Developed and optimized the majority of ETL mappings for the overall DataMart.
- Trained offshore resources and fresh graduates on client functionality and Informatica best practices.

Senior Software Engineer / Application Development Senior Analyst | Project: Investment DataMart | Mumbai, India (Jan 2014 – Mar 2015)

Environment: Informatica PowerCenter 8.x/9.x, Oracle 10g/11g, Unix, Control-M

- Owned offshore delivery for monthly releases, from issue analysis through deployment and validation.
- Produced effort estimations and delivery plans using client-defined estimation frameworks.
- Engaged directly with clients to gather requirements and delegated work across the delivery team.
- Introduced process optimizations that streamlined monthly cycles and improved daily load efficiency.

Software Engineer / Application Development Analyst | Project: Integration Project | Mumbai, India (Mar 2013 – Jan 2014)

Environment: Informatica PowerCenter 8.x/9.x, Oracle 10g/11g, Unix, Control-M

- Supported enterprise data integration following a large-scale company acquisition.
- Enabled rapid team onboarding by delivering functional walkthroughs and project overviews.
- Engineered reusable UNIX batch processing frameworks applicable across multiple source systems.
- Resolved high-priority UAT defects with rapid turnaround, ensuring release stability.

Software Engineer / Application Development Analyst | Project: Production Maintenance | Mumbai, India (Sep 2011 – Feb 2013)

Environment: Informatica PowerCenter 8.x/9.x, Oracle 10g/11g, Unix, Control-M, PeopleSoft

- Developed requirement specifications and ETL design documents for production enhancements.
- Built and enhanced business mappings to address defects and business change requests.
- Provided production support for batch operations and financial close cycles, ensuring SLA adherence.

PERSONAL DETAILS

Date of Birth: 14th July 1989 | **Languages Known:** English, Hindi | **Address:** Indore, India
