SUMMARY

Senior ETL Testing and QA Engineer with 6+ years of overall IT experience, including ETL Testing validating complex data pipelines, ensuring data quality, and driving test automation. Skilled in ETL, Data Warehouse (DWH) and Data Migration Testing, with expertise in Python automation, Snowflake, and SQL. Proven ability to deliver robust solutions across cloud platforms (AWS, Azure, GCP) in Agile environments, while effectively collaborating with cross-functional teams and contributing to overall data governance

EDUCATION

B.E (Computer Science Engineering)

Visveshwaraya Technological University

2011 - 2015

Jnana Vikas Institute of Technology

Certification

Indian Institute of Technology – Madras (IIT-M)

2022 - 2024

Master Data Science Program

SKILLS

ETL Testing	Data Validation	Data Warehouse (DWH) Testing		
PL-SQL	Regression Testing	Integrating Testing	SQL	
Data Quality Rules		Data Ingestion	Query Development	
Defect Management	Azure	Python Automation for Testing		
Test Strategy	Data Transformations Test		Defect Life Cycle	
snowflake	Python	Informatica	Transformation	GCP
Reconciliation	SCD Validation	Control-M	Power BI	

KEY ACHIEVEMENTS

Optimized Testing Efficiency

Reduced data validation time by 30% using automated Python scripts for test execution.

Ensured Data Integrity

Successfully managed 50+ defects to closure per project within Agile sprints using Jira.

Strengthened Data Governance

Improved overall data quality management through well-defined test strategy and consistent documentation practices.

Enhanced ETL Automation

Maintained reusable Python and SQL validation scripts, improving regression test coverage and data quality reporting.

Demonstrated Learning

Consistently enhanced technical and analytical skills by contributing to higher testing efficiency and team performance.

EXPERIENCE

Senior Software Engineer-(Contract)

Taltech Technologies Pvt Ltd

2025 - 2025 Bangalore, India

- Designed and executed detailed ETL test cases covering data ingestion, transformation, and integration in cloud environments with snowflake DB.
- Performed source-to-target mapping and data validation for complex data warehouse (DWH), ensuring high data quality standards.
- Managed Python automation scripts for regression testing, data reconciliation, and data quality rules to reduce manual effort.
- Managed defect lifecycle using HP ALM and Jira within Agile sprints, ensuring timely resolution and strong collaboration with data engineering teams.

Senior Quality Engineer

Larsen &Toubro Infotech

2021 - 2022 Bangalore, India

- Developed advanced SQL queries to verify transformations and aggregations across multiple layers.
- Documented test strategy, scenarios, and defect reports, improving transparency and governance.
- Performed data reconciliation and regression testing across staging and target environments including snowflake database.
- Collaborated with data engineers and other teams for defect triage and sprint reviews.
- Implemented data quality rules, transformations, and SCD validations across multiple layers and BI testing.

Senior Associate

SBS Technologies Pvt Ltd

2020 - 2021 Bangalore, India

- Designed and executed ETL test cases for data migration and transformation projects.
- Validated data completeness, accuracy, and referential integrity between source and target systems.
- Performed incremental load validation and ensured data quality through reconciliation reports.
- Collaborated with QA leads to identify, log, and track defects using Jira.
- Documented test results and participated in daily Agile stand-ups to report test progress.

Associate

Aegis Technologies Pvt Ltd

2018 - 2019 Bangalore, India

- Supported ETL testing team by executing SQL queries to validate data extraction and transformation.
- Performed basic source-to-target data validation to ensure consistency between systems.
- Assisted in reconciliation testing for migrated data across staging and reporting layers.
- Logged and tracked defects in Quality Center (QC) and coordinated with developers for resolution.
- Participated in daily Agile stand-ups and sprint retrospectives.
- Helped prepare test data, maintain documentation, and support test execution activities.

Product Designer

Hinduja Global Solutions Pvt Ltd

2016 - 2018 Bangalore, India

- Analyzed customer interaction data and designed reporting dashboards that improved visibility into product performance and customer trends.
- Designed and optimized process flow documents and UI layouts for internal products, ensuring seamless coordination between support and development teams.
